

# This season, banish cellulite from your wardrobe.

Cellulite. That stubborn, orange-peel dimpled effect that really doesn't go with anything.

Whilst it doesn't affect your health, most agree it's not a good look. The bad news is, healthy eating, exercise and 'miracle' creams alone won't necessarily get rid of it. However, there is a bright side.

Accent treatment from the Cindy Knight Clinic is a simple, easy and effective way to reduce cellulite dramatically. Accent is non-invasive – the procedure can be done in your lunch break – and its effects are long lasting. You can expect to lose up to 2cm circumference from the thigh in one half-hour session.

Now that is a good look.

Accent is clinically proven and recommended by top dermatologists. It can be used to treat the thigh, hip, buttock, upper arm, stomach and chin area, and gives a smooth, young and visibly improved result.
